VIOLENCE DETECTION

GIUDE : SUBI MISS

TEAM MEMBERS : SHARON VS,YADHU KRISHNA MK, SREEKATH M,MOHAMMED SWALIH KA

ABSTRACT

Whereas the action recognition community has focused mostly on detecting simple actions like clapping, walking or jogging, the detection of fights or in general aggressive behaviors has been comparatively less studied. Such capability may be extremely useful in some video surveillance scenarios like in prisons, psychiatric or elderly centers or even in camera phones. The primary function of large-scale surveillance systems deployed in institutions such as schools, prisons and psychiatric care facilities is for alerting authorities to potentially dangerous situations. However, human operators are overwhelmed with the number of camera feeds and manual response times are slow, resulting in a strong demand for automated alert systems. Through this automated alerted system authorities can take immediate action.

PROPOSED SYSTEM

Explore and propose advanced deep learning architectures tailored for aggressive behavior recognition. This might involve combinations of convolutional and recurrent neural networks or attention mechanisms to capture both spatial and temporal information effectively develop models that go beyond simple action recognition to understand the context and subtleties of human behavior. Consider incorporating natural language processing techniques for improved context comprehension in scenarios where audio data is available.

EXISTING SYSTEM

CCTV monitoring is the only existing system, where authority need to manually check the video for identifying violence.

MODULE

The application contain mainly 5 modules

1.Admin
2.Authority
3.Parent
4.Security guard
5.camera

Admin

1.Login

2.Change password

3.Department Management

4.Course Management

5.Staff Management

6.Student Management

7.Authority Management

8.View Violence Report And more

9.View check in check out report

10.View out pass request

11.View late come report

Authority

1.Login

2View profile

3.Change password

4.View request for out pass and accept/reject

5.View approved out pass

6.View rejected out pass

7.View check in/checkout report

8.View violence alert

9.Chat with parent

10.View complaints and send reply

Parent

1.Login

2.View student

3.Request for out pass

4.View out pass status

5.View check in/checkout

6.View violence report

7.Send complaint and view reply

8.View authority

9.Chat with authority

10.Change password

Security guard

1.Login

2.View profile

3.View gate pass request and allow

4.View Violence Notification

5.Change password

Camera

1. Check in/check out entry based on face recognition
2. Detect violence & send to parent

SOFTWARE & HARDWARE REQUIREMENT

SOFTWARE REQUIREMENT

Operating System : Windows 8 or above
Front End : Html,Css,Javascript,Bootstrap, XML
Back End : Mysql

HARDWARE REQUIREMENT

Processor : Pentium 4 or above
Hard disk : 80 GB and above
RAM : 4 GB and above
Monitor : SVGA color
Keyboard : 104 keys
Mouse : Optical/scroll mouse
